These efforts are intended to improve the long-term capacity of the U.S. solar industry, although they are unlikely to have immediate effects on the current inverter shortage.

In November, the Lithuanian government passed a law blocking remote Chinese access to solar, wind and battery installations above 100 kilowatts - by default restricting the use of Chinese...

A five-year supply deficit and exploding demand for AI data centers, EVs, and solar energy are driving the surge. While technically overbought, analysts target \$150 as silver outshines gold.

Crucial to panels, inverters and batteries, semiconductors are the solar industry's silent workhorses; however, material scarcity and supply chain issues loom.

Trade and supply-chain frictions have resulted in an acute shortage of solar photovoltaic (PV) equipment in the United States that risks abruptly slowing the rate of solar PV installation.

NERC plans to issue an alert in the next month regarding modeling deficiencies and technical requirements to integrate more IBRs into bulk power system, officials said. New solar, wind ...

In recent weeks, three major western inverter manufacturers - SMA Solar, Enphase and SolarEdge - have reported challenging financial results and job cuts.

Solar inverter prices have been on the rise, with crucial components such as semiconductor chips in short supply globally, and compounding this challenge is the acute shortage ...
