We manufacture a complete line of remote solar powered solutions for telecom/tower sites that are operational in any environment. We have designed systems for surveillance tower sites for homeland ...

Solar retrofit of existing grid-connected sites pre-equipped with rectifiers: Solar reduces electricity costs (OPEX), provides greater security and keeps the site up and running during prolonged outages.

Portable solar containers fill the gap for power generation and in-the-field use. Solar containers provide a complete package of power generation with military-grade robust protection.

Discover how solar panels efficiently power communication towers and remote stations, providing sustainable energy solutions for off-grid locations.

Somewhere in the background, likely baking in the sun or enduring a blizzard, is an outdoor photovoltaic energy cabinet and a telecom battery cabinet, quietly powering our digital ...

Our solar telecom power system ensures stable and continuous energy supply to small cellular base stations in remote areas. without relying on the grid or diesel generators, helping telecom operators ...

The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load ...

Extend the range and coverage area of a telecommunications network to hard-to-reach and remote locations with our solar power kits. Our kits can be scaled to power any equipment necessary, and ...
