Brightline West, the proposed high-speed railway connecting Las Vegas to suburban L.A. by private equity billionaire Wes Edens, also intends to rely on carbon-free electricity. Unlike...

Combined Wind and Solar is a graphical representation of estimated wind and solar power production amounts for the Current Operating Day and the Next Day.

This paper employs modeling and simulations coupled with experimentation to establish a functional relationship between the percentage of solar power gain, tropospheric height, and wind ...

As the California High-Speed Rail Authority gears up for this ambitious feat, its solar-powered trains will not only offer a sustainable alternative but will also achieve impressive speeds ...

California's high speed train network, spreading across 1287.5 KM of the US, is to be the world's first high speed train that will run entirely off of solar energy.

The solar energy system is planned to be ready four years earlier in 2026. As the world's first high-speed train fully powered by renewable energy, it could serve as a model for green ...

China unveiled a hydrogen-powered high-speed train that produces no planet-warming pollution. Even Texas, long a bastion of dirty-energy-dependent transit, has announced plans for a...

California's long-awaited high speed train will be solar powered, according to the California High-Speed Rail Authority.
