Is the residential solar market down?

The residential solar market is down, not out. Our analysis indicates that the market is likely to revert to more stable long-term growth over the next several years on the back of strong fundamentals. Almost certainly, surprises will pop up along the way; the industry is not called the solar coaster for nothing.

Will solar power and wind power grow in 2027?

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027.

Did Samsung sell the rights to a solar power project?

On the 5th, Samsung C& T's trading division revealed that it sold the rights to a solar power generation project, twice the size of Yeouido (538 hectares), located in the Dunmore area of Queensland, Australia, to the British Octopus Group.

Will solar power grow in 2025?

We expect that solar electricity generation supplied to the grid managed by the Electric Reliability Council of Texas (ERCOT) will grow from 56 BkWh in 2025 to 106 BkWh by 2027. Increasing amounts of battery storage capacity help to support the fluctuations in solar output during the day.

Solar alone accounted for 56 percent of all new generation capacity in the first half of 2025. When combined with energy storage, the share rose to 82 percent of new power added to the ...

The solar power generating facility that can be seen from Interstate 15, just across the state line from Primm, is set to partially shut down, according to its operators.

The residential solar market is down, not out. Our analysis indicates that the market is likely to revert to more stable long-term growth over the next several years on the back of strong ...

SunPower, one of the largest, oldest, and most influential solar businesses in the United States, has closed its doors. Residential solar installers in the United States have struggled as ...

Cooperatively owned solar systems are still taking off in both California and Texas, while the Lone Star State continues to beat records for solar-power production.
