Enel's award-winning solar grazing agreement puts 13,000+ sheep managing vegetation on solar farms, embracing agrivoltaics at industrial scale.

Solar grazing is the practice of using sheep to manage vegetation at solar energy sites. Solar farms need regular maintenance to keep grass, weeds and brush from growing too high and ...

The American Solar Grazing Association (ASGA) promotes grazing sheep on solar installations. Find where our members are located using our interactive map.

Solar grazing is a form of agrivoltaics-a land use strategy that combines renewable energy production with livestock grazing. On solar farms, sheep graze beneath and around the ...

Solar grazing is an innovative practice gaining momentum across the United States, where sheep graze beneath and around solar panels on solar farms. This dual-use approach not only supports clean ...

Solar companies are increasingly adopting sheep grazing as a sustainable alternative to gas-powered mowers for maintaining solar farms. This eco-friendly practice not only reduces ...

In a groundbreaking study that combines renewable energy with traditional farming practices, researchers have observed remarkable changes in 1,700 sheep grazing amidst solar panels.

Solar shepherds, who manage sheep grazing under solar panels, are part of a growing movement that combines agriculture and renewable energy -- and offers high incomes in the process.
