Australian research and development (R& D) in energy storage and other renewable energy technologies, such as solar PV, could be combined with the prowess of Chinese ...

With us, you don't just power your home, you invest in your future. Discover how to future-proof your home and turn your excess electricity into an income stream.

China's JinkoSolar has submitted plans for a 600MW solar-plus-storage project in Queensland, Australia, to the federal government.

From outback solar farms to coastal cities, Chinese energy storage expertise is helping rewrite Australia's energy rules. The question isn't whether storage will transform the grid - it's how quickly ...

Chinese PV giant signs a 5 GWh battery supply deal for a portfolio of storage projects, mostly located in Australia.

This international trade fair focuses on solar PV, storage, and complementary technologies. The name of the fair reflects its emphasis on solar energy and energy storage.

Falling costs of storage and need to tailor output of solar is encouraging China PV giants to double up on solar and batteries, and build the projects themselves.

Chinese solar developer Jinko Power has filed an application with the Australian government seeking approval for a 600 MW solar farm and 800 MWh battery energy storage project ...
