Where are Australian solar modules made?

Australian Solar Manufacturing Pty Ltd is the pioneer company to specialise in the production of high-powered 190-200 watt solar modules in Australia, modules are assembled with imported raw materials such as EVA, TPT, Junction Box, Glass, Silicone, Aluminium frame and solar cell. Components are sourced from Germany, Japan, USA and China.

What is solar panel manufacturing in Australia?

Solar panel manufacturing in Australia has a relatively short but impactful history. In the early 2000s, a few local companies began producing solar panels to meet the growing demand for renewable energy. However, large-scale manufacturing has always been limited due to high production costs compared to overseas competitors.

What is the current landscape of solar technology manufacturers in Australia?

Let's dive into the current landscape of solar technology manufacturers in Australia. Australia has a rich solar research and development history, but establishing a solid domestic manufacturing sector has proven difficult. Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels.
