How does a rooftop solar system work?

Once permits are in place, the actual Rooftop Solar Installation begins. Mounting structures are fixed to the roof, solar panels are installed, and all components are connected. Wiring is done carefully, ensuring safety and reliability, and then the system is connected to your home's electrical panel.

What is a rooftop solar system?

A rooftop solar system consists of solar photovoltaic (PV) panels mounted on the roof of a building. These panels absorb sunlight and convert it into electricity, reducing or even eliminating your dependence on traditional power sources.
