Ongoing projects to expand the electricity grid and develop energy storage solutions are creating a supportive ecosystem for integrating renewable energy sources.

With a population projected to grow and electricity demand expected to rise steeply, Somaliland must act now to bridge the energy gap. The sun and the wind are free--but making them ...

Increasing the penetration of renewable energy (particularly solar PV and wind energy), would reduce the needed capacity from HSDGs, facilitating substantial reduction in the electricity ...

This article highlights the current status of Somaliland's energy sector, its vast renewable energy potential, ongoing reforms, and the investment opportunities available for local and ...

Despite this low base, Somaliland has great natural resource potential to increase its renewable energy capacity particularly in the areas of solar and wind generation.

However, Somaliland has abundant renewable energy resources, particularly solar and wind. Its location in the Horn of Africa provides it with some of the highest solar irradiance levels in...
