What is Streetlight-EPC?

The project "STREETLIGHT-EPC" created demand and supply for EPC projects in 9 regions by setting up regional EPC facilitation services. These services provide comprehensive support to municipalities (street lighting operators) and SMEs as potential ESCOs.

What are EPC street lighting services?

These services provide comprehensive support to municipalities (street lighting operators) and SMEs as potential ESCOs. The project partners implemented more than 50 EPC street lighting projects in the project's lifetime (April 2014 - March 2017). This helped to create knowledge and trust in both LED technologies and the EPC model.

Is street lighting a good 'learning and testing ground' for EPC?

Street lighting is a good "learning and testing ground" for EPC due to its lower technical and economic complexity (compared to building-related EPC). Furthermore, the recent market introduction of LED technology for street lighting offers high energy and cost savings with comparatively short pay-back times.

Is energy performance contracting a good solution for street lighting refurbishment?

Energy performance contracting can be a very good solution to make street lighting refurbishment happen: guaranteed energy services in the form of EPC work best in cases of high energy and costs savings potentials. The project "STREETLIGHT-EPC" created demand and supply for EPC projects in 9 regions by setting up regional EPC facilitation services.

To use an integrated energy storage cabinet, install batteries and related equipment into designated compartments. The cabinet provides a centralized and secure storage solution for energy storage ...

Designed for C& I project developers, EPC contractors, installers, and renewable energy integrators, the Wenery ESS cabinet offers flexible capacity configuration and supports both on-grid and off-grid ...

In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy resources. Scalable from single asset control to complex microgrid and utility environments.

Outdoor Energy Storage All-in-One Cabinet from China--weatherproof, scalable, and IoT-enabled for solar, industrial, and EV applications
