Wison and Sungrow are setting a new industry standard with the launch of MegaFlex. Establishing a plant-as-a-product approach, rather than introducing new electrolysis technology, is a ...

On June 11, 2025, Wison Engineering, a global leading provider of energy engineering EPC services and technology integration solutions, and Sungrow Hydrogen Energy, a company specializing in ...

The plant is expected to produce 1,800 tons of green hydrogen annually. This hydrogen will be used to fuel hydrogen buses and industrial vehicles, such as dump trucks and excavators, in ...

At this year's SNEC 2025 in Shanghai, Sungrow Hydrogen and Wison Engineering unveiled a modular hydrogen production platform that signals a fundamental shift in how large-scale ...

Sungrow Hydrogen and Wison Engineering made waves in the green energy sector by jointly launching MegaFlex "Plant-as-a-Product" - a turnkey solution that reshapes green H<sub>2</sub> ...

Rapid Response Wide-Range Operating High Efficiency. Intelligent Start/Stop Grid-Friendly User-Friendly. Service is as important to us, as it is to you. That's why we offer a fully integrated system ...

Sungrow Hydrogen's electrolyser system has begun producing green hydrogen in Hubei, China, integrating both alkaline and PEM electrolysers in joint operation.

At the SNEC 2025 expo, Sungrow Hydrogen and Wison Engineering introduced MegaFlex, an advanced modular solution designed to transform large-scale green hydrogen production.
