How is energy used in Syria?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is solar energy a viable source of energy in Syria?

Some households have since turned to solar energy as a supplementary source of energy, though high costs limit widespread adoption. In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy (hydro) accounted for 0.7%.

How much energy does Syria produce in 2021?

In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy (hydro) accounted for 0.7%. From 2000 to 2021, 22 Metric tons of CO₂ has been emitted, which contributes to 0.07% of total energy emissions and a 41% decrease in CO₂ emissions.

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

Search all the latest and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Syria with our comprehensive online ...

Most of Syria's oil and natural gas fields are located in the eastern part of the country. As of publication, the YPG controlled the bulk of the fields in northeast Syria. Control of these fields is a ...

Well, there you have it - Syria's energy future isn't about choosing between survival and sustainability. With smart storage solutions, it can achieve both simultaneously.

The growing network of battery energy storage companies in Syria demonstrates remarkable adaptability in addressing energy poverty through modular solutions and smart grid technologies.

Sanctions lifted in June 2025 have allowed Syria to re-enter the global market, with the first crude shipment in 14 years. Major agreements include a \$7 billion (£5.7 billion) power generation ...

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids,

containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy(hydro) accounted for 0.7%. From 2000 to 2021, 22 Metric tons of CO₂ has been emitted, which contributes to 0.07% of total energy emissions and a 41% decrease in CO₂ emissions. Electricity consumption per capita has decreased by 43% between this period, with a 4.5% share of power generation on renewables in 2021 alone.

Extron exports high-quality inverter, solar, and gel batteries to Syria, ensuring durable and efficient energy storage for all power needs.
