In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk.

President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

In response, the U.S. Department of the Interior (DOI) issued guidance on July 15, 2025, mandating that all wind and solar energy projects now require direct approval from the Secretary of ...

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up.

This growth highlights the importance of battery storage when used with renewable energy, helping to balance supply and demand and improve grid stability. Energy storage systems ...
