Here the mass of He gas $w=11.28\text{g}$ The molar mass of He $M_{\text{He}}=4\text{g/mol}$; So number of moles of He in the sample $n_{\text{He}}=w/M_{\text{He}}=11.28/4=2.82\text{mol}$ Now initial volume of the gas ...

Nevertheless, the annual world production of solar cells in 2005 was 820,000 kW, with Japanese companies producing almost 50 percent. Reducing production costs is essential to the expansion of ...

One man by the name of Ferdinand Cohen-Blind, a German, believed that Bismarck was leading Germany to the brink of civil war and decided to take action. It should be stated that Ferdinand ...

See a solution process below: First, we need to determine how much was left before the man spent 20%. We can rewrite this part of the problem as: 10200 is 80% of what? We are using ...

We have put together a comprehensive history of the development of solar power. View our infographic timeline including key inventors and important milestones

In 1883, New York inventor Charles Fritts created the first practical working solar cell by coating selenium wafers with an extremely thin layer of gold--a device that could generate consistent ...

As the photovoltaic (PV) industry continues to evolve, advancements in Japan invented solar power generation have become critical to optimizing the utilization of renewable energy sources.

On June 9, 2008, Japanese Prime Minister Yasuo Fukuda said in his speech at the Japan Press Club that Japan plans to increase the introduction of solar power generation by ten-fold by 2020, and forty ...
