Use a hair dryer to heating up then scrape it off. Saw a vid on for how to get old stickers off glass, might work.

I have some used PV & the plastic is coming off the back of one. Its like a window tint film almost but white. It's the 'back sheet'. They're white to reflect a bit more power back into the panel ...

In summary, while glue spots on solar panels can be a nuisance, the application of effective strategies leads to successful removal. Knowledge of the adhesive type, adept chemical ...

To remove sticker residue from glass or as a simple way to remove a sticker from a mirror, cover the adhesive with anything that contains oil, such as canola or olive oil, ...

When warranty labels, serial numbers or other tags that uniquely identify an item have been removed or obliterated, it is almost always because someone is selling an item that they don't ...

In my 2022 Tab 320S I noticed the film a bit loose around the edges. I started peeling off the film about four inches from the corners. The adhesive is very strong and most of it remains on the panel. I ...

It softens the adhesive enabling removal, yet should not harm the solar panel. Spray it on, let it soak for a few hours or overnight, then wipe it off with something non-abrasive, like a shop towel.

New solar panels often arrive with protective film--but should it stay on? This comprehensive guide explains the crucial difference between factory shipping films (which must be ...
