Under the terms of the phased agreement, Peak Energy will supply up to 4.75 GWh of its sodium-ion battery energy storage systems (ESS). These systems are slated for deployment across ...

If the planned deliveries are completed as scheduled, the United States could see the creation of the world's largest portfolio of sodium-ion battery storage projects between 2027 and ...

Under the agreement, Peak will deliver 720 MWh of storage in 2027 - the largest single sodium-ion battery deployment announced so far. The deal also includes an option for an additional 4...

China has officially set up a sodium-based electricity storing cell which is currently the largest across the globe with a whopping capacity of 100 MWh in Qianjiang, Hubei Province.

A groundbreaking sodium-ion battery project in China's Hubei province has been switched on, boasting an impressive capacity of 100,000 kWh. This immense energy storage system ...

Armed with government R& D grants and the need to balance renewable energy in the national electricity grid, HiNa Battery has unveiled the world's biggest sodium-ion storage system.

In truth, the "world's largest" sodium-ion battery system in Qianjiang is proof that the unique power pack chemistry can store a hoard of renewable energy, reliably putting it on the...

Burlingame, California-based Peak Energy just scored a huge win for sodium-ion batteries. The company announced a multi-year deal with utility-scale battery storage...
