---

After passing all acceptance tests, the power station was officially certified as fully completed and functioning in 2020. Besides electricity generation, the Three Gorges power station ...

According to the project plan, the base will have an 8.5 GW solar plant and a 4 GW wind plant, along with supporting energy storage facilities with a capacity of five gigawatt-hours and six ...

It has a total investment of approximately 4.93 billion yuan and will construct a 100MW solar thermal power generation + 200MW photovoltaic power generation + 400MW wind power generation facility.

China Three Gorges Group has connected to the grid a 1 GW hybrid concentrated solar power (CSP) and photovoltaic (PV) project in Hami, Xinjiang. The facility, described as the largest ...

China Three Gorges Corp., a Chinese state-owned power company, connected 3.48 GW of solar to the grid at seven sites in the final week of December. The projects include China's largest...

Developed by the Three Gorges Corporation, a wind and solar energy company headquartered in Guazhou County, China, the new facility combines efficiency, innovation and large ...

Located in Guazhou County of northwest Chinas Gansu Province, a novel dual tower/ dual solar field concentrated solar power (CSP) plant has started commissioning and testing and is ...

On January 23, 2026, the 100MW tower-type molten salt photothermal power generation project of Three Gorges Energy, in which Shouhang High-tech was a key member of the consortium, ...
