NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown ...

The University of Louisiana, Lafayette found that, in 2023, solar supported over 600,000 total jobs, when accounting for indirect jobs (created by business to business transactions with other industries) and ...

Variable labor (\$/hr) and electricity rates (\$/kWh) are currently believed to be the greatest source of differences in regional PV manufacturing costs. Variations are also expected for delivery of ...

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

Find up-to-date statistics and facts on the global solar photovoltaic industry.

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from ...

The total value of global PV-related trade - including polysilicon, wafers, cells and modules - exceeded USD 40 billion in 2021, an increase of over 70% from 2020.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.
