Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

How is Tunisia strengthening the electricity authorization regime?

Today, Tunisia is continuing to strengthen this framework through various actions. Recent advances include : The implementation of a fixed feed-in tariff for the authorization regime, accompanied by a revision of the electricity purchase agreement (PPA).

Why should Tunisia invest in tereg?

" By fostering renewable energy development, TEREK will strengthen Tunisia's position in clean energy, creating economic opportunities and ensuring long-term energy security," said Alexandre Arrobbio, World Bank Country Manager for Tunisia. " This project reflects our strong partnership with Tunisia and supports its sustainable development goals.

How can Tunisia tackle the energy price gap?

This pricing gap makes energy subsidies a significant burden on the state budget. To address these challenges, Tunisia has set ambitious targets : Reducing carbon intensity by 45% by 2030 and increasing renewable energy's (RE) share to 35% of electricity production.

Meta Description: Explore how Tunisia's new energy storage subsidy policy reshapes renewable energy investments. Learn about eligibility criteria, financial benefits, and how EK SOLAR delivers tailored ...

Aligned with the Government's updated Energy Transition Strategy, TEREK aims to strengthen STEG's operational and financial performance, attract private investment, and lower the ...

Tunisia's battery energy storage market is experiencing transformative price reductions driven by technological advances and renewable energy expansion. As costs continue falling, storage ...

TuNur - Renewable energy, storage and transmission TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export.

Eckehard Tröster and Rabea Sandherr travelled to Tunisia to present the results and findings of the
