Will energy storage systems improve Ukraine's power grid?

DTEK reports that construction proceeded faster due to the need to complete the project before the onset of the autumn-winter period. Experts report that energy storage systems will provide Ukraine's power grid with additional resilience and stability.

Does DTEK have energy storage facilities in Ukraine?

This was reported by DTEK's press service. The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and Dnipropetrovsk regions.

Will DTEK save Ukraine's power?

The DTEK project can store 400 MWh of electricity, which is enough to provide power to 600,000 Ukrainian homes for two hours. The investment will help reduce the risk of accidents and power outages, especially in the event of possible damage to maneuverable generation facilities due to shelling.

What makes a flywheel a great energy storage system?The flywheel is modular and offers unparalleled configurability in terms of power to energy ratio, which makes it the first dynamic ...

Project construction and commissioning, split between six sites across Ukraine, was completed in under six months to ensure it is ready to operate during the upcoming winter season

DTEK, Ukraine's biggest private energy company, has begun final commissioning of the country's largest battery energy storage project, the company announced on July 10 at the Ukraine ...

Equipment installation up to low voltage connection point. switchgear, substation. Includes excavation for flywheel.

Fluence has successfully completed the largest battery-based energy storage project in Ukraine, showcasing its leadership in energy storage solutions. The project was constructed and ...

The construction of the project was completed in six months, from March to August 2025, which is significantly faster than the industry average for projects of such complexity.
