The design of Sandpoint outdoor integrated cabinet energy storage system has independent self-power supply system, temperature control system, fire detection system, fire protection system, emergency ...

Portable Solar Cold Room is a storage system powered by solar photovoltaic with battery backup that can be integrated into various agricultural value chains to provide storage for a wide range of items at ...

NuAire ultra low temperature laboratory freezers provide energy-efficient and reliable low temperature storage for vaccines and cell culture samples and other research and laboratory storage applications.

The two-time foaming technique is used to protect isolation layer from being damaged by low temperature. Leakage of cold air is prevented by using separate inner & outer doors.

Our solar system cabinets are specifically engineered to address the challenges posed by cold weather. With features such as insulation, heating systems, and proper sealing and ...

The VAULT100 is built for fast temperature recovery with your everyday facility challenges in mind. Its enhanced engine, electronics and cabinet/inner door design ensure it gets back to temperature quickly.

Gold Controller uses an integrated, microprocessor-based control system that includes an LED display for the actual chamber temperature and a 4x20 LCD screen which displays the set and ambient ...

It is an autonomous, solar-powered cooling system that can be integrated into various agricultural value chains. Our solution can store agricultural products such as fruits, vegetables, herbs, seeds, and ...
