You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there is not a universal solar energy solution, in this ...

When you hear "off the grid," you might picture a cabin in a remote area powered by a few solar cells and wind turbines, completely disconnected from modern conveniences. But the reality is ...

To actually take solar energy and turn it into usable electricity, you need both solar panels and a power station. On top of that, most portable power stations and solar panels are made...

When you use a solar panel system -- also called a photovoltaic or PV system -- to produce power for your home, you won't have to buy as much electricity from the utility company, and you get the ...

Solar panels, made up of photovoltaic (PV) cells, are installed on your roof or another sunny spot. These cells capture sunlight and convert it into direct current (DC) electricity. The ...

Install a mounting system and an inverter to convert electricity. Once you have your solar panels picked out, you can install the mounting system on your roof or on the ground. Then, attach ...

Use energy on your own terms Generac Solar & Battery Solutions provide a more powerful, resilient and smart way to manage your energy needs. With rising electricity costs and an aging grid, it's time for a ...

How does solar power work? This article lays out the basic science of how solar panels work and how it relates to powering your home and saving money.
