Will Vatican City run on solar power?

A letter entitled 'Brother Sun' laid out the pontiff's plans. Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome. The power generated could supply all of Vatican City's energy needs.

Why did Acea install a solar energy system in Vatican City?

This project was carried out by ACEA, an Italian utility company, which installed systems to meet all of the Vatican's energy demands. What makes this significant is not the size, but that Vatican City is only 0.49km², and there was no loud campaign, no press tour, just action set in stone and implemented.

Why does the Vatican have a solar system?

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant to supply the Vatican with energy from Santa Maria di Galeria. On the same site, the new solar infrastructure now stands.

How many electric vehicle charging stations are there in the Vatican?

The installation of 35 electric vehicle charging stations throughout the city-state is a clear indicator of this commitment. These stations are available not only for official Vatican vehicles but also for employees, representing a broader effort to modernize transportation and reduce the carbon footprint within the Vatican's borders.

One of the most notable solar projects in Vatican City is the solar roof of the Paul VI Audience Hall. The photovoltaic panels installed here generate approximately 300,000 kilowatt-hours of energy annually.

One of the Vatican's most notable initiatives is the expansion of solar energy systems across key locations, including the entrance to the Vatican Museums and the Vignaccia area. It is difficult to ...

To model what this could look like, he announced that solar panels would be installed on a Vatican-owned property outside Rome, and the power generated from that could supply all of ...

Yet this 44-hectare city-state has become an unexpected pioneer in renewable energy integration. The Vatican photovoltaic energy storage power stations demonstrate how even the most historically ...

On September 8, 2024, the GSL ENERGY 60kwh wall-mounted battery home energy storage system was

successfully deployed in Guatemala, bringing new changes to the local household energy ...

These stations are available not only for official Vatican vehicles but also for employees, representing a broader effort to modernize transportation and reduce the carbon footprint within the...

A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.
