Venezuela did not import electricity. Power generation, which includes electricity and heat, is one of the largest sources of CO2 emissions globally, primarily from the burning of fossil fuels like coal and ...

Besides hydroelectric power, Venezuela also relies on natural gas and petroleum, contributing 25% and 11%, respectively, to the total electricity output that year.

Several factors have severely hampered Venezuela's energy sector, most notably government mismanagement, international sanctions, and the country's economic crisis.

The electricity sector in Venezuela is heavily dependent on hydroelectricity, which accounted for 64% of the nation's electricity generation in 2021. Besides hydroelectric power, Venezuela also relies on natural gas and petroleum, contributing 25% and 11%, respectively, to the total electricity output that year. The country operates six hydroelectric plants, totaling a capacity of 16,010 megawatts (MW), with the Central Hidroel#233;ctrica Guri in Orinoco being the most significant, acco...
