-----

Over 1,500 new solar power installations have gone online over the past six months, helping fulfil the needs of 57,500 households in Vienna. Vienna has already met its target for ...

The city of Vienna is therefore setting a good example by installing photovoltaic systems on public buildings and areas close to the city. At the same time, partnerships with businesses and ...

SolarSK completed a 1.3 MW rooftop solar plant for Technopark Vienna in just 3 months. The project powers refrigeration, production, and 300 electric buses, cutting energy costs with green ...

Vienna is already the sun capital. Since the start of Vienna's solar power offensive in 2021, photovoltaic output in Vienna has quadrupled. 10,000 photovoltaic systems now provide ...

At the heart of the facility's energy system are over 1,130 photovoltaic-thermal hybrid modules (PVT), supplied by the Saxony-based manufacturer Sunmaxx. Installation and planning of ...

Austria's largest regional energy provider expanded its green electricity portfolio with approximately 70 new photovoltaic systems, a new hydroelectric power plant, and the expansion of ...

The products and solutions on display in Vienna span rooftop systems, solar fa&#231;ades and building-integrated photovoltaics (BIPV). Self-consumption will be the dominant theme, reflecting a ...

Together with our partner Energie-Interessen, we have realized a large-scale rooftop system consisting of more than 330 HeliaSol solar films on the Wien Energie power plant in Vienna Simmering.
