The time required to maintain the batteries in a typical small UPS battery cabinet, small telephone office, or power company substation, in ...

The warranty period begins from the date of first purchase with original receipt, or if no receipt is available, from the manufacturer's shipping date as stated on the battery.

The warranty period begins on the date of purchase from UPG per the receipt or invoice. Batteries replaced under the warranty provisions will carry only the remainder of the original warranty period.

It is not recommended to store a lead acid battery bank more than 6 months without charging. Battery banks purchased for new substation projects are typically delivered as soon as the control house is ...

Since most substations are unmanned, this is usually recommended. IEEE Std. 4505, and IEEE Std. 11886 are more demanding maintenance documents and should be considered.
