Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.

Average lithium-ion battery pack costs fell 8% to \$108/kWh in 2025, a 93% drop since 2010. China leads at \$84/kWh with LFP, while stationary storage packs hit benchmark lows of ...

Over recent years, high-scale production and capital investment into the battery production process have made lithium-ion battery packs cheaper and more efficient.

Lithium-ion battery pack prices fell 20% in 2024 to \$115/kWh. Discover what this means for EVs, battery energy storage systems, and commercial & industrial energy storage.

Trade with lithium price data that is unbiased, IOSCO-compliant and widely used across the energy commodity markets. Our lithium prices are market-reflective, assessing both the buy- and sell-side of ...

In 2025, the average energy storage cost ranges from \$200 to \$400 per kWh, with total system prices varying by technology, region, and installation factors.

Annual operational costs for utility scale battery storage projects are typically low - around 2% of capex. We assume 2%, equivalent to \$2.5/kWh/year, which covers routine ...

Up-to-date lithium battery cost guide with a detailed USD/Wh table: wholesale pack averages, and retail examples (EcoFlow, BLUETTI, Jackery, UDPOWER). Learn what drives \$/Wh ...
