The LONGi bifacial solar panel is lightweight, thanks to its 2+2 mm glass, and its reliability is enhanced by POE encapsulation. The solar panel's shorter frame side, designed to protect against damage ...

"LONGi offers three series of solar modules: Hi-MO 4, Hi-MO 5, Hi-MO 4m is a monofacial product of the Hi-MO 4 series, and is mainly used on the roofs of industrial, commercial and residential buildings. Hi ...

Our list was compiled based on numerous factors, most notably the financial strength of the company, length of business, and customer reviews. We will break down the types of LONGi solar panels ...

In May 2017 LONGi launched the bifacial and dual glass module based on the bifacial PERC cell well ahead of the competition. Since then, LONGi has continued to promote the bifacial module to ...

LONGi has launched a new solar panel designed for durability and reliability in hail and windstorms. The Hi-MO 5 Ice-Shield module is a dual-glass bifacial panel that uses thicker top-glass ...

Thanks to the bifacial cell layout, they can convert not only direct sunlight but also reflected light from the back into electricity. The double-sided glass structure also protects the cells from environmental ...

LONGI Solar panels show good efficiency and reach up to 25% conversion rate. The engineers make use of the latest technologies such as multibusbars, half-cut cells, PERCs and N ...

HPBC (Hybrid Passivated Back Contact) is LONGi self-developed and named hybrid passivated back contact cell technology. It is a new generation of high-efficiency cell technology featuring no grid lines ...
