Planting under or near powerlines can be challenging. Here are some suggestions of some good plants for this location.

In this blog, we'll explore the advantages of planting trees around solar farms, discuss some regulatory requirements, and recommend some of the tree varieties in stock that are perfect for ...

Selecting the right trees typically involves understanding their growth patterns, canopy configurations, and potential shading effects on solar panels. Tall or leafy trees, if positioned too ...

You'll want to choose trees that won't grow tall enough to shade your solar panels. Dwarf or semi-dwarf varieties of fruit trees are excellent options, as they typically stay under 15 feet tall. ...

So, if you're considering agrivoltaic farming, here's your guide to the best crops that flourish under solar panels. Solar panels don't just produce electricity--they create shade, reduce ...

Planting new trees on any property is a great way to beautify. But it can also be a huge hassle for solar arrays. Picking trees does not need to be complicated though. Here's a simple framework you can ...

Welcome to agrivoltaics - the game-changing practice of growing crops under photovoltaic arrays. Recent data shows agrivoltaic systems increased global farmland productivity by 60% last year, but ...

Indeed, much of the coffee and chocolate (cocoa) consumed as beverages has been grown under shade-bearing, nitrogen-fixing legume trees such as madrecaao (*Glyricidia sepia*), a ...
