Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Montserrat California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest ...

Discover the top 5 solar-powered countries in 2025. From China to India, explore global solar capacity, growth trends, and future projections in renewable energy.

Most operational CSP stations are located in Spain and the United States, while large solar farms using photovoltaics are being constructed in most geographic regions. The worldwide growth of ...

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed ...

Our rundown of the countries around the world using the most solar energy, from Mexico to China

Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such as per capita measures, as well as ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar ...
