Trina Solar Limited started operations in 1997 in China as a solar panel installation company. The company began manufacturing its own components in an effort to provide customers with the best ...

Trina is a huge global company, manufacturing in dozens of facilities worldwide - but most of the product we see in Australia comes from China.

Trina Solar is a leading Chinese brand consistently ranked among the top 5 largest monocrystalline solar panel manufacturers, known for advanced solar cell technology and designs.

Trina Solar, established in 1997 by Jifan Gao in Changzhou, China, has grown into a global leader in photovoltaic (PV) manufacturing. Initially focusing on system installations, the ...

Trina Solar was founded in 1997 in Changzhou, Jiangsu Province, during the early stages of China's solar industry development. The company initially focused on manufacturing silicon solar ...

Founded in 1997, Trina Solar Co., Ltd. is a global leader in photovoltaic modules and smart energy solutions. Headquartered in Changzhou, China, with regional headquarters and ...

Maybe our lack of familiarity with Trina stems from the fact that they are headquartered in Changzhou, China and not in a high tech/green energy hotspot like California.

The Trina Vertex S+ is one of the most popular PV units for residential properties in the UK. It uses a compact 30mm frame, keeping its overall weight down to 23.5kg per unit (output dependent).
