Here is the list of world's leading renewable energy generating countries in the world. 1. China is a global leader in wind energy generation. The country had a significant installed capacity ...

China has ranked first worldwide in installed wind power capacity for 15 consecutive years. The country's wind power capacity has expanded to 600 million kW by the end of November ...

Kenya is building a wind farm, the Lake Turkana Wind Power (LTWP), ...

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

Wind electricity generation, billion kilowatthours, 2022: The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the ...

This graphic highlights the top 15 countries by total installed wind turbine capacity, based on data from the Energy Institute's Statistical Review of World Energy 2024 report.

China is the largest producer of wind power in the world, having generated 466.5 terawatt hours (TWh) of wind power in 2021, more than 29% of the global total of 1,596.4 TWh produced during the year.

The United States ranked second by a wide margin, with roughly half of China's production. Germany and Brazil were third and fourth in the ranking, respectively.
