What is a solar fan hat?

A solar powered fan hat is a specially designed sun hat equipped with a solar panel and a small electric fan, usually mounted at the front. When exposed to sunlight, the panel converts solar energy into electricity, activating the fan to direct airflow toward your face.

Are solar powered fan hats eco-friendly?

The solar panels on the hat absorb sunlight and convert it into energy to power the fan, making it an eco-friendly alternative to traditional battery-powered fans. Solar powered fan hats are often used for outdoor activities such as hiking, camping, and fishing, where there is limited access to electricity.

What is a solar hat & how does it work?

It's a solar-powered personal fan system built into a hat. The hotter it gets, the harder it works. Mini Fan Cools Your Face & Forehead: No batteries. No cords. Just breeze. Sun's out. Sweat's dripping. You're outside roasting like a rotisserie chicken--and your regular hat's just holding the heat in. Osmo SolarHat changes that. This isn't a gimmick.

Are solar powered fan hats waterproof?

They are made from good materials that are designed to withstand the rigors of outdoor use. Solar powered fan hats are also waterproof and resistant to UV radiation, which means that they can be used in all types of weather conditions. Shop our collection of solar powered fan hats.
