The World Bank is inviting consultants to submit proposals for a technical study on a 350 MW to 400 MW solar project with battery energy storage in Tunisia. The deadline for applications is March 24. [pdf]

The Government of Uganda has authorised engineering, procurement, and construction (EPC) contractor Energy America to build a 100MWp solar PV plant, integrated with a 250MWh battery ...

Signed on July 28, 2025, in Sofia, the deal marks a major step in energy transition for Southeastern Europe, combining SUNOTEC's expertise in solar infrastructure with Sungrow's globally acclaimed ...

Yamoussoukro, like many sun-rich regions, faces this exact challenge with solar energy. While photovoltaic panels generate clean power during daylight, energy storage solutions ensure 24/7 ...

This 150MW/300MWh facility - comparable to powering 90,000 homes daily - combines cutting-edge lithium-ion batteries with solar hybridization, making it a blueprint for renewable energy integration ...

200 GW of energy storage is currently seeking interconnection! The rapid increase of BESS and hybrid projects on the bulk power system (BPS) warrants a look at where this technology started and how it ...

This article explores innovative solar storage solutions, regional case studies, and emerging opportunities for industrial/commercial users seeking reliable power infrastructure.

The latest Africa Energy Report (2024) shows solar and wind contributing just 3% to the national grid - but here's the kicker: Yamoussoukro's positioned to flip this script through strategic energy storage ...
