

Title: Zhao Liang Solar Power Generation

Generated on: 2026-05-05 14:22:18

Copyright (C) 2026 ELALMACEN SOLAR. All rights reserved.

His current research interests include renewable energy grid integration, concentrating solar power plant grid integration, and power system analysis. His email is zhaoliang3@epri.sgcc.cn.

Affiliations: [Electric Power Eco-Tech Research Institute (of State Grid Ningxia), Yinchuan City, Ningxia Province].

He is currently a postdoctoral researcher with KTH Royal Institute of Technology, Stockholm, Sweden. His research interests include modeling and control of power electronic converters and systems. He ...

All-perovskite tandem solar modules are promising to reduce the cost of photovoltaic systems with their high efficiency and solution fabrication, but their sensitivity to air still imposes a...

In this paper, the cost development trend of photovoltaic (PV) power and concentrating solar power (CSP) generation is analyzed, and the levelized cost of energy (LCOE) of solar power generation is ...

The GFM converter, utilizing the proposed control method, successfully achieves fast power regulation while minimizing the power coupling. Both simulation and experimental results validate the ...

Liang Zhao's 5 research works with 8 citations and 98 reads, including: Development modes analysis of renewable energy power generation in North Africa

All-perovskite tandem solar modules are promising to reduce the ...
